

Ario's Lighting System for Hospitality

Better Health through Better Lighting

Ario solves sleepless nights and drowsy afternoons with its Intelligent Lighting System designed to support a healthy Circadian Rhythm. Providing bright cool light in the morning and warm amber light at night can restore the rhythm that your body has lived under since the dawn of time.

"Ario will keep your brain on schedule and make your day."

-CNET

WHY ARIO

- Better Sleep
- Improved Mood and Productivity
- Unique and Personalized Stay
- Energy Savings \$70/room/year*
- 17% More efficient than CFL's
- Ario LED's Last 20+ Years

* compared to incandescent or halogen bulbs.

FEATURES

• Lighting Control Features

- Automatic Lighting Adjustment Based on Guest and Environmental Input
- Manual Color and Brightness Control
- Personalized Lighting Schedule
- Individual Lighting Control

• Centralized Control

- Facility and Room Level Control
- Individual Room Alarms can be Set by Front Desk

• Clock Features

- Clock / Alarm Clock
- Sunrise Alarm
- Nap Mode
- Sleep Sounds
- Weather Reporting / Forecast

• Sensor Features

- Occupancy - Vacancy
- Noise Detection with Automatic Alerts
- Humidity - Temperature
- Ambient Light

BR30 / A19 Bulbs

Ario Bulbs are available in **BR30** (75W equivalent) and **A19** (60W equivalent). These bulbs use a standard E26 base and fit in most fixtures.

- Automatic Lighting Adjustment Based on Guest and Environmental Input
- Manual Color and Brightness Control
- Full Brightness Control
- 20+ Year Bulb Life
- \$70/yr savings per Room*

Sensor/Button Modules

The ceiling mounted **Sensor Module** is used to monitor room conditions.

- Multiple Sensors
 - Occupancy / Vacancy
 - Temperature / Humidity
 - Noise Detection with Alerts
 - Ambient Light

The **Button Module** allows for manual bulb adjustments.

- Individual Lighting Controls

Touch Screen Controller

The **Ario Touch Screen Control** is used to manage the rooms lighting system and alarm clock functions.

- Clock / Alarm Clock Functions
 - Sunrise Alarm
 - Nap Function
- Sleep Sounds
- Weather Reporting and Forecast

Light and the Body

Decades of research from Harvard Medical School, NASA, and leading institutions around the world have revealed a great deal about how light impacts our health.

We designed the Ario Intelligent Lighting System system based on this large body of research and on recommendations from the National Institute of Health and American Medical Association.

Ario promotes healthy circadian rhythms, restful sleep, and overall well-being:

- Blue-rich light stimulates cortisol production in the morning to synchronize circadian rhythm and promotes alertness.
- Warm Amber light at the end of the day makes it easier to relax and prepare the body for sleep by facilitating the release of melatonin.
